

Forensic Benchmarking of Waste Management

\$55M Turnover

 We saved \$31,708 PA / 47%

The Challenge

- The Timber business was unsure did they have competitive rates for their Waste management.
- They were unaware was the operational solution aligned to their operating model?
- No one has the time or expertise to challenge the status quo.

The Ultimate Goal

- To at least understand is the operational service aligned to the business?
- Did they have competitive rates, as when they challenged their waste provider they did not have the market knowledge?
- Ultimately can they reduce their waste expense?

The Business Payoff

Current Waste management solution had not been Benchmarked	
Current Waste Cost was	\$ 67,133
Benchmark Solution Implemented	\$ 35,424
